Inviscid model curves stay on $Q/Q_0 = 1$ while E grows;
blue plane: ceiling $\alpha'\Omega_{\text{eff}} = Q$ (Lean); $N = 32^3$, $\alpha' = 1/25$, seed 0
Navier–Stokes ($m \equiv 1$), ν=0
Navier–Stokes ($m \equiv 1$), ν=1/100
piecewise scale-dual, ν=0
piecewise scale-dual, ν=1/100
smooth (ML-α), ν=0
smooth (ML-α), ν=1/100
$E(t)/E_0$ (dimensionless)
$Q(t)/Q_0$ (dimensionless)
$\alpha'\,\Omega_{\text{eff}}(t)/Q_0$ (dimensionless)
