Every non-trivial root recovered from O_0 counts has $|z|^2 = 2$
(max $||z|^2 - 2| = 4.4\text{e-}16$, $p \le 83$)

recovered root of $N_e(p)$ recurrence

root of an invisible orbit, root number -1 (PARI T_2)

trivial root $z = 2$ (Eisenstein)

cylinder $|z| = \sqrt{2}$
